Description

- ▶ Web application that acts as an online portfolio and booking site that will be used to streamline my freelance modeling career.
- ▶ It allows users to see some of my best images, read about my accomplishments, contact me, and book appointments.

Planning – User Stories

- ▶ Users are able to create accounts and log in to the application.
- ▶ Users are able to click through a slideshow of my modeling portfolio.
- ▶ Users will be able to submit comments about the site.
- ▶ Users will be able to book shoots with me via forms.

Planning - Database

The database includes:

- ▶ User accounts and passwords
- ▶ Comments
- ▶ Appointments

Features

- ▶ Image slideshow
- ▶ User login/logout
- ▶ Comment/contact page
- ▶ Booking page

Technology Stack

- ▶ JavaScript/Node
- ▶ Express
- ▶ HTML/Pug
- ▶ CSS/Bootstrap
- ▶ Mongoose/MongoDB
- ▶ Visual Studio

Demo

What I Learned

- ▶ JavaScript/Node
- ▶ Express
- ▶ Pug
- ▶ Mongoose/MongoDB

What's Next

- ▶ Add more options to the booking forms.
- ▶ Add a calendar that shows my availability.
- ▶ Only allow users who are signed in to book appointments.
- ▶ Make things more aesthetically pleasing.
